

BRAIN WARM-UP

Half of humanity (3.5 billion people) live in cities today and 5 billion people are projected to live in cities by 2030.¹

If half of humanity is 3.5 billion people, how many people are there living on Earth? (Hint: $3.5 \text{ billion} \times 2$)

95% of urban expansion (people moving from rural areas to urban ones) in the next decade will take place in the developing world.¹

Colour around 95% of this circle.

828 million people live in slums today and most of them are found in Eastern and South-Eastern Asia.¹

Colour the map of Asia below.

2

The world's cities occupy just 3% of the Earth's land, but account for 60-80% of energy consumption and 75% of carbon emissions.¹

What are 3 ways to reduce carbon emissions?

1. _____
2. _____
3. _____
