

INVINCIBLE INNOVATORS!

You are going to research an innovator or leader to present to your class. Look for someone who is leading the quest of sustainability (e.g. creating new jobs, fighting climate change, finding solutions to problems such as world hunger and clean water... etc.)

Instructions:

- Start by researching an innovator that interests you
- Take notes on the innovator that you have chosen
- Take those notes and turn them into a large poster
- Present to the class!

INVINCIBLE INNOVATORS!

Some innovators that I'm interested in investigating:

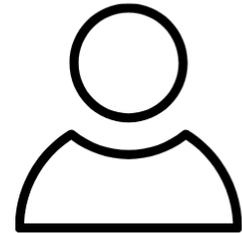

Name: _____

Well Known For: _____

Name: _____

Well Known For: _____

Name: _____

Well Known For: _____

Name: _____

Well Known For: _____

Innovator I selected: _____

Where were they born? _____

Where are they living now or when did they die? _____

What is their innovation? _____

What is the world issue they are trying to solve? _____

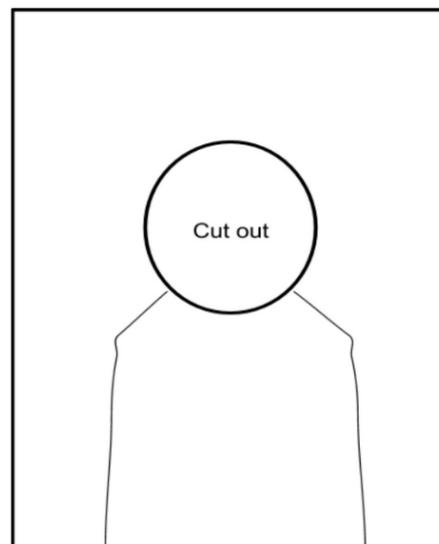

Why are they considered a sustainable superhero? _____

What is something that you find interesting about them? _____

Other Notes: _____

Now that you have finished taking notes, you're going to want to start your poster! You'll need to separate your information into sections. Once you're finished with each section, you'll cut a large hole in the middle of a poster (ask your teacher for help) and you'll draw the body of your inventor! Use things such as string for hair, 3D paper hats... etc. Be creative! Make sure your poster is full of colour!

Example:

GOAL 9: INDUSTRY, INNOVATION AND INFRASTRUCTURE
